

Human Development & Family Studies

Graduate Program Handbook

College of Health and Human Sciences
Iowa State University
Fall 2025

Welcome to the Department of Human Development & Family Studies Iowa State University

This handbook is intended to assist graduate students and faculty with a variety of important tasks during the graduate school experience. This handbook is distributed to students during HDFS 5010, Graduate Studies, Research, and Ethics in HDFS and to new faculty hired in the department. The handbook is not intended to replace more formal sources such as the [ISU Graduate College Handbook](#) or the [Iowa State University Catalog](#). Over the years, graduate students and faculty have compiled this information and advice to aid communication and understanding about the graduate school process. This handbook was originally developed by Phyllis Harris, Cristina Watkins, and Dahlia Stockdale in 1996. We would appreciate receiving your input and suggestions for future editions.

Please Note: Handbook revisions occasionally occur due to ever-changing university and departmental policies. To be sure you have the latest information, please consult the online version: <https://www.HDFS.hs.iastate.edu/graduate-programs/>

Dr. Tricia Neppl, PhD
Director of Graduate Education (DOGE)

Dr. Amie Zarling, PhD
HDFS Professor and Department Chair

HDFS PROGRAM OF STUDY OPTIONS

Degree Options

The Department of Human Development and Family Studies (HDFS) at ISU offers the degrees of **Master of Science** (MS; Thesis & Non-Thesis options) and **Doctor of Philosophy** (PhD). Both are research-based degrees that require the student to apply theory and research in a creative component, thesis, or dissertation. All students take a CORE set of courses. The academic plan is then completed with a selection of courses that meets the individual goals of the student.

Also available is the concurrent BS/MS degree in Financial Counseling and Planning. Graduate students seeking the BS/MS degree follow the same procedures outlined in this handbook for MS students. The only difference between the two is that the BS/MS applicant submits application materials during the junior year of their HDFS undergraduate program at ISU.

HDFS Minor

Students outside of HDFS may choose to obtain a Minor in HDFS. Nine credits are required for MS students, while twelve credits are required for PhD students. Degree Requirements can be found at <https://hdfs.hs.iastate.edu/academics/graduate-programs/graduate-minor/>

Outside Minors for HDFS Students

HDFS graduate students may also choose minors from many fields, including but not limited to anthropology, economics, gerontology, journalism, psychology, sociology, statistics, and women's studies.

HDFS Graduate Certificate

- Developmental and Family Sciences Advanced Research Design and Methods

The HDFS Certificate has a rolling admission deadline (applications are accepted on a continual basis for the following semester). To apply, visit the [graduate student application webpage](#). HDFS graduate students and graduate students outside of HDFS may choose to obtain this graduate certificate. Fifteen credits are required for the research design and methods certificate.

Current students need to submit a *“request to pursue a certificate in addition to a graduate degree.”* This form is available on the [Graduate College website](#). Current students can log onto the site using their ISU credentials to complete the request. Please note that you will complete a separate academic plan form and a certificate completion form after taking all academic plan coursework.

AFFILIATED PROGRAMS: NON-THESIS OPTIONS

Distance Education Programs:

Master of Family and Consumer Sciences - Family Financial Planning (MFCS-FFP)

The Family Financial Planning 30-credit degree program and the 18-credit certificate program are offered online in collaboration with the Innovative Digital Education Alliance (IDEA). Universities collaborating through the IDEA have combined resources to enable students to obtain a Master of Family and Consumer Sciences in Family Financial Planning (MFCS-FFP) via distance education. Contact person: ISU online, (idea@iastate.edu). For more Family Financial Planning information, visit the website:

<https://iowastateonline.iastate.edu/programs-and-courses/financial/family-financial-planning-master-of-family-and-consumer-sciences/> For questions related to advising for this program, please contact Dr. Jonathan Fox, jjfox@iastate.edu.

Master of Family and Consumer Sciences - Gerontology (MFCS-GERON)

The Gerontology 30-credit degree program and the 15-credit certificate program are offered online in collaboration with the Innovative Digital Education Alliance (IDEA). Universities collaborating through the IDEA have combined resources to enable students to obtain a Master of Family and Consumer Sciences in Gerontology (MFCS-GERON) via distance education. A computer with minimum specifications, Web access, and an email address are required for completing the program. Contact person: ISU online, (idea@iastate.edu). For questions related to this program please contact Dr. Jennifer Margrett, margrett@iastate.edu.

Master of Family and Consumer Sciences – Youth Development (MFCS-YTH)

The Youth Development 36-credit degree program, 12-credit Youth Development Specialist graduate certificate, and 12-credit Youth Program Management and Evaluation graduate certificate programs are offered online in collaboration with the Innovative Digital Education Alliance (IDEA). Universities collaborating through the IDEA have combined resources to enable students to obtain a Master of Family and Consumer Sciences in Youth Development, and/or graduate certificate(s), via completely online, asynchronous courses. Contact ISU online (idea@iastate.edu) or visit the website: <https://iowastateonline.iastate.edu/programs-and-courses/human-development/>. For questions related to advising for this program, please contact Dr. Meghan Gillette, meghang@iastate.edu.

Master of Family and Consumer Sciences – Family and Community Services (MFCS-FAM)

The Family and Community Services 36-credit degree program is offered online in collaboration with the Innovative Digital Education Alliance (IDEA). Universities collaborating through the IDEA have combined resources to enable students to obtain a Master of Family and Consumer Sciences in Family and Community Services, via completely online, asynchronous courses. Contact ISU online (idea@iastate.edu) or visit the website:

<https://iowastateonline.iastate.edu/programs-and-courses/human-development/>. For questions related to advising for this program, please contact Dr. Kere Hughes-Belding, kereh@iastate.edu.

HDFS PROGRAM OF STUDY COMMITTEE

The student and academic plan committee (APC) develop the student's academic plan, which is a listing of courses required for the student's degree. This academic plan becomes a contract between the student and ISU that lists the specific requirements for graduation. This contract should be electronically filed through Workday, *preferably by the **start of the second semester*** of full-time residence or before 9 graduate credits are completed for part-time students. The APC, including the Major Professor, helps the student build on their prior background and develop the skills and knowledge to reach their professional goals while meeting program requirements. Students who wait to complete the academic plan until late in their program may be required to take additional coursework beyond the courses already completed. After electronic approval from the APC, the form is routed to the Director of Graduate Education (DOGE) for approval and then to the Graduate College for final approval.

Please Note: It is the student's responsibility to track the academic plan throughout the approval process. Only the student can view the routing process in Workday.

The CORE course requirements for the MS and PhD programs appear on the following two pages. At ISU, graduate courses, those with numbers in the 5000's or 6000's, are taught by members of the graduate faculty. As a general rule, 5000-level courses are entry-level or MS level offerings, while 6000-level courses are highly specialized and typically intended for PhD level study.

HDFS Master's and Doctoral Graduate Core Grade Policy

HDFS Graduate Students at the Master's and Doctoral level are expected to achieve competence in multiple domains, including human development and family theories, as well as quantitative and qualitative research methods. In order to maintain excellence in the program and prepare students for success in their fields, students must fulfill the requirements of the HDFS Graduate Core Grade Policy.

A student who receives a grade of C+ or below in any HDFS CORE course must repeat that course. If the student receives a C+ or below for the Repeated Course, the student will be dismissed from the program. Students may work with their APC and DOGE to remediate the content of the course.

Inclusion of 3000/4000 level courses on Academic Plan

Undergraduate Courses on Academic Plan

From Grad school website:

With Academic Plan Committee (APC) approval, graduate students will be permitted to use undergraduate classes from Iowa State both within and outside of their majors on their Academic Plan (AP). Undergraduate classes from other institutions are not eligible for academic plan inclusion. Other caveats include:

- No 1000- or 2000-level classes may be used, but up to nine credits of 3000- and 4000-level classes at Iowa State may be eligible*
- Students are limited to 9 credits at the undergraduate level, with a limit of 3 credits at the 3000 level.*
- If a 3000-level class is used, it must be a course outside of the student's undergraduate major*
- Credits did not count towards their undergraduate degree.*

Please Note:

- Graduate students who take undergraduate classes are not required to do extra work or to be exposed to material more advanced than what is taught to undergraduates.**
- In contrast, dual-listed courses (offered at both the undergraduate and graduate level) are required to expect more of graduate students who enroll at the 5000 level.**
- An individual's APC may prohibit the use of undergraduate classes or may make the use of undergraduate classes more restrictive than does the university-wide policy.**

REQUIREMENTS FOR THE MASTER'S DEGREE

Curriculum and Course Requirements

A listing of CORE and other course requirements for the MS degree is available on the department website. A typical timeline and procedure checklist leading to the master's degree is listed in **Exhibit 1. To register for thesis credits (HDFS 6990) or creative component credits (HDFS 5990), you will need to sign up for 6990 or 5990 via Workday and then your Major Professor approves in Workday.** No departmental request form is required.

Committee Structure and Function

The Master's academic plan committee (APC) consists of at least three members of the Graduate Faculty at ISU. The committee must include one member from outside the student's field of emphasis. The outside member(s) provides relevant specialized knowledge, or a different perspective helps to the planning, execution, and reporting of research, or some aspect of intellectual diversity deemed important by the committee and/or major. Outside committee members can be drawn from HDFS, as well as other departments. Prior to choosing your committee members, ask your Major Professor for member suggestions.

The APC usually meets at least three times. It is essential for the student to work closely with the Major Professor to prepare for each of these meetings.

- At the **first meeting**, usually during the second semester of enrollment, the committee discusses and approves the academic plan. Student submits an electronic [Academic Plan form](#) after this initial meeting. This meeting may also include a preliminary discussion of research ideas in order to receive feedback and suggestions from the committee.
- At the **second meeting**, a proposal meeting (thesis/creative component) is held. A copy of the proposal should be given to each member of the committee no later than two weeks prior to the meeting. Students must have the APC complete the Report of Master's Proposal Completion Form (at this meeting), which can be found on the department website or obtained from the Graduate Program Assistant. The student is responsible for organizing the meeting time and place with the respective committee members for the proposal meeting.
- The **final meeting** of the committee is the Final Oral Examination or defense of the thesis or creative component. The student is responsible for organizing the meeting time and place with the respective committee members (email hdfsrooms@iastate.edu to request a meeting room), completing the graduate college [Preliminary or Final Oral Exam Request](#) (*due at least 3 weeks before the exam*), and providing each member of the committee with a copy of the thesis/creative component no later than *two weeks prior to the meeting*.

Please Note: It is important to schedule meetings 4 to 6 weeks in advance. However, please do not schedule meetings months in advance only to cancel due to lack of preparation. It is especially difficult to schedule meetings between semesters or during the summer; furthermore, the Graduate College will most likely not approve last-minute committee replacements to accommodate scheduling conflicts.

Please Note: DeAnn will check with departmental staff regarding keys and outstanding receipts or bills with the department, then the DOGE will sign the final Approval Slip in Workday. The Major professor will confirm that your IRB approval is included (thesis) in your Appendices.

TIP: A word to the wise, finish your thesis/creative component defense several weeks before the Graduate College deadline in order to allow time for revisions and for the electronic deposit. *If you miss the deadline, you will not graduate in the desired term.*

TIP: Many students find it helpful to remind APC members of scheduled meetings a few days prior to the date by sending emails or perhaps also noting the time and place of the meeting on the proposal or thesis. These reminders are particularly helpful if the meeting is scheduled far in advance or if the meeting is held during a particularly busy time of the semester, such as finals week.

MS Curriculum and Course Requirements

A listing of CORE and other course requirements for the MS degree is available below:

<i>MS Core (Thesis and Non-thesis)</i>			Credits
HDFS	5010	Graduate Studies, Research & Ethics in HDFS (2)	2
		<u>Theory:</u>	6
HDFS	5100	Theories of Human Development (3)	
HDFS	5110	Family Theory (3)	
		<u>Research/Statistics:</u>	13
HDFS	5030	Introduction to Research Design (4)	
HDFS	5050	Application of Quantitative Research Methods (3)	
HDFS	5040	Qualitative Research Methods(3)	
		Additional Credits in Research/Statistics (3)	
		<u>Electives:</u>	9
		Note: ALL Must Be Taken in HDFS	
		<u>Thesis/Creative Component:</u>	5
HDFS	6990^a	Thesis Research (5) OR	
HDFS	5990^a	Creative Component (5)	
		MS Core Total*	35
*Minimum Credits. ^a Thesis and creative component credits are pass/fail.			

Elective Credits Policy for HDFS Master's Degree Students (Approved by Graduate Faculty on November 2, 2015). Of the 9-elective credits in HDFS, up to 3 independent study credits in HDFS (e.g., 5900/5910 and 6900/6910) may be counted toward your degree requirements.

Thesis Research

Throughout the thesis writing process, you will work closely with your Major Professor. The Major Professor will help you divide the thesis into manageable steps, and plan a realistic timeline, **usually requiring two to three semesters**. Typically, thesis writing requires several drafts and multiple revisions. This may be two drafts for one student or 10 plus versions for another student, depending on multiple factors. **Please leave ample time for the writing and reviewing process**. By the time a student begins the thesis, however, they should have developed the necessary skills and knowledge from the CORE curriculum to be successful in the thesis. ***Be sure to read below about IRB requirements for human subjects research.***

Thesis writing is a major component of the master's program. All ISU theses have to be in digital format ("ETDs" converted to a single file in PDF format) and submitted online. The procedures and requirements are at <http://www.grad-college.iastate.edu/current/thesis/>.

Because all theses are cataloged in the ISU Library, formatting requirements are very exact. Thesis seminars are offered every semester to clarify ISU's publishing requirements, submission procedures, and common problems for graduate theses and dissertations ***HDFS students are strongly encouraged to attend the thesis seminar.***

All graduate theses and dissertations submitted to ISU must comply with the requirements established by the Graduate College. The Graduate College reviews the electronically deposited final thesis or dissertation and approves the final format before signing the final Approval Slip.

Creative Component (MS-HDFS)

Non-thesis students must present substantial evidence of individual accomplishment (e.g., a special report, capstone course, integrated field experience, annotated bibliography, research project, design, or other creative endeavor). A minimum of 5 credits of such independent work is required on the academic plan. The element of creative independent study must be explicitly identified on the academic plan. The format of the creative component is determined in cooperation with the APC. As with a thesis, a creative component should be submitted to members of the committee two weeks before the final oral examination. All creative components will be electronically submitted to the [graduate college](#).

Credits for a special report, research project, or other independent work designated as a creative component under the non-thesis master's degree option are assigned under course number 5990. If your creative component includes human subjects research, ***be sure to read below about IRB requirements for human subjects research.***

IRB Requirements for Thesis/Creative Components

Thesis/creative component data based on human subjects research must come from participants who have voluntarily consented to participate in a research study. The data must come from projects that have been reviewed and approved by an Institutional Review Board (IRB) or deemed not human subjects research by federal regulations. To omit this approval jeopardizes all research funding to ISU from federal sources. IRB approval **cannot** be given retroactively. When using secondary data or if you are unsure that your project is human subjects research, consult the [Office of Research Ethics](#) to determine if you need approval. If your project is deemed "not human subjects research" from the self-test, print a copy of the resulting determination and include it in your Appendix.

All personnel listed on a human subjects form must have completed CITI training and be affiliated with ISU in the CITI system in order to be added to any research protocol with human subjects. Go to the Human Subjects Training website and follow the instructions for required training. Please Note:

THE MAJORITY OF HDFS STUDENTS WILL COMPLETE THE SOCIAL AND BEHAVIORAL RESEARCH TRACK EVEN IF THEY ARE USING BIOMARKERS.

For student submissions, the Major Professor or supervising faculty member's contact information must be included on the consent form. The [IRB website](#) contains all information about training and the approval process.

REQUIREMENTS FOR DOCTORAL DEGREE

Admission to the PhD Program following the MS Degree (at ISU)

Master's students who have not been directly admitted to the PhD program (MS/PhD) will have to submit a request to “*transfer from one program/department/certificate to another.*” This form is available on the [Graduate College website](#). Additionally, the student will also need to submit the HDFS Supplemental Information Sheet, answers to the eight questions on the form, transcripts, and three new letters of recommendation, typically from the Major Professor as well as instructors or assistantship supervisors. It would be very unusual for a student to be admitted to the PhD program without a strong letter of recommendation from the Major Professor that documents the student's thesis progress and that describes the student's research skills (i.e., analyzing, synthesizing, designing, and writing). GRE scores are not required.

Application Deadline

The deadline for application submissions each year is the beginning of December, with a second deadline in early January. Successful applicants have earned GPA's above 3.50 in their graduate coursework. They also have made substantial progress towards completing their Master's degree. For students either accepted directly into the PhD program before finishing the thesis or those who apply following a master's degree program, acceptance is always conditional on satisfactory completion of the master's degree, including the thesis. Students who are applying to the PhD program from a master's program but have not completed the thesis can be admitted to the PhD program and will have one year in which to complete a mini-thesis.

Mini-thesis Requirement

A student admitted to the PhD program from a non-thesis graduate program must successfully complete work comparable to a research thesis in HDFS. We call this research study a “mini-thesis.” See **Appendix D** for the mini-thesis policy. Students must submit a “mini-thesis” proposal to a committee consisting of two HDFS graduate faculty members, who also approve the final product. Students submit an electronic copy of the completed mini-thesis, along with a *memo from the mini-thesis committee* indicating satisfactory completion of this requirement to the DOGE. **The mini-thesis requirement must be completed within two years of entering the PhD program, and you can receive 5 graduate credits of HDFS 6990 for completing the mini-thesis.**

Mini-thesis data based on human subjects research must come from participants who have voluntarily consented to participate in a research study. The data must come from projects that have been reviewed and approved by an Institutional Review Board (IRB) or deemed not human subjects research by federal regulations. To omit this approval jeopardizes all research funding to ISU from federal sources. IRB approval **cannot** be given retroactively. When using secondary data or if you are unsure that your project is human subjects research, consult the [Office of Research Ethics](#) to determine if you need approval. If your project is deemed “not human subjects research” from the self-test, print a copy of the resulting determination and include it in your Appendix.

All personnel listed on a human subjects form must have completed CITI training and be affiliated with ISU in the CITI system in order to be added to any research protocol with human subjects. Go to the Human Subjects Training website and follow the instructions for required training. Please Note:

THE MAJORITY OF HDFS STUDENTS WILL COMPLETE THE SOCIAL AND BEHAVIORAL RESEARCH TRACK EVEN IF THEY ARE USING BIOMARKERS.

For student submissions, the Major Professor or supervising faculty member's contact information must be included on the consent form. The [IRB website](#) contains all information about training and the approval process.

PhD Curriculum and Course Requirements

A listing of CORE and other course requirements for the PhD degree is available below:

PhD Core			Credits
HDFS	5010	Graduate Studies, Research & Ethics in HDFS (2)	2
		<u>Theory:</u>	6
HDFS	5100	Theories of Human Development (3)	
HDFS	5110	Family Theory (3)	
		<u>Research/Statistics:</u>	18
HDFS	5030	Introduction to Research Design (4)	
HDFS	5050	Application of Quantitative Research Methods (3)	
HDFS	5040	Qualitative Research Methods(3)	
HDFS	6030	Advanced Quantitative Methods (3)OR	
HDFS	6040	Advanced Qualitative Methods (3)	
HDFS	6080	Grant Writing for Research (3)	
		Additional credits of stat/research methods (2)	
		<u>Internships^a:</u>	6
HDFS	6910	A (College Teaching)(3)	
HDFS	6910	B (Research) OR D (Professional Experience) (3)	
		<u>Other coursework:</u>	
		Additional credits of other coursework Note: 15 Credits Must Be Taken in HDFS	25
HDFS	6990	Dissertation Research ^b	15
		PhD Core Total*	72
*minimum credits; ^a Students who have had substantial independent college teaching and/or independent research experience and/or professional experience may have the internship requirement waived; ^b 5 of the 15 credits are either the transfer of MS thesis research or credits needed to meet the mini-thesis requirement—approved by Graduate Faculty Spring 2014.			

Elective Credits Policy for HDFS PhD Degree Students (Approved by Graduate Faculty on November 2, 2015). Of the 15 elective credits in HDFS, up to 9 independent study credits in HDFS (5900/5910 and 6900/6910) may be counted towards your 72 credit minimum related to the PhD academic plan.

A typical timeline and procedure checklist leading to the PhD degree is listed in **Exhibit 2**. To register for dissertation credit (HDFS 6990), you will need to sign up for HDFS 6990 via

Workday and then the faculty supervisor approves. No form is required.

The PhD degree requires a minimum number of graduate credits (72), including credit for the master's degree. **Students may transfer in no more than 36 graduate credits earned at a B or better level from another institution.** Your adviser or Major Professor can advise you on what will likely transfer but must be approved by your APC, the DOGE, and the Graduate College. Graduate College regulations require that students complete all PhD coursework within five years of the master's degree completion. For more information on overage or [expired coursework](#), please consult the graduate college handbook (Chapter 6.3.4).

Internship Requirements

PhD students are required to complete at least 3 graduate credits of a teaching internship (HDFS 6910A); and 3 credits of either the research internship (HDFS 6910B) or professional experience (HDFS 6910D) as part of the PhD program of study. This requirement is to remind students that most jobs will require evidence of practical skills in these areas, which must be documented in letters of recommendation provided by the Major Professor and other faculty. You register through Workday and then the supervising faculty approves. Requirements for the internships are described in **Appendix A**. Registering for internship credits requires a course syllabus that is developed in collaboration between the supervising faculty member and student intern.

Committee Structure and Function

The PhD APC, which should be selected during the second term in the student's graduate program, determines the selection of appropriate coursework for the student. The PhD APC consists of at least five members of the Graduate Faculty at ISU. The committee must include ***at least three members from the department*** and ***one member from outside the student's field of emphasis***. The outside member(s) of the APC provide relevant specialized knowledge or a different perspective helpful to the planning, execution, and reporting of research or some aspect of intellectual diversity deemed important by the committee and/or major. Outside committee members can be drawn from HDFS. Prior to choosing your committee members, ask your Major Professor for APC member suggestions.

Generally, the **PhD APC meets at least three times**, although the student and/or Major Professor may call the committee together as deemed necessary. The student works closely with the Major Professor to prepare for each of these meetings.

The purposes of each of the three meetings are to:

1. Review and approve the student's academic plan, which identifies the courses required for the degree as well as plans for the Student Professional Development Portfolio (SPDP).
2. Participate in an oral prelim (dissertation proposal meeting) and be examined over the requirements of the SPDP.
3. Administer the final oral examination over the defense of the dissertation and the SPDP.

The student is responsible for organizing the meeting time and place (email dhbarnes@iastate.edu request a meeting room), notifying the respective committee members of the time and place, and providing each member of the committee with a copy of any proposal or dissertation no later than one week prior to the meeting.

Please Note: It is important to schedule meetings 4 to 6 weeks in advance. However, please do not schedule meetings months in advance only to cancel due to lack of preparation. It is especially difficult to schedule meetings between semesters or during the summer; furthermore, the Graduate College will most likely not approve last-minute committee replacements to accommodate scheduling conflicts.

TIP: Many students find it helpful to remind APC members of scheduled meetings a few days prior to the date by sending emails or perhaps also noting the time and place of the meeting on the proposal or thesis. These reminders are particularly helpful if the meeting is scheduled far in advance or if the meeting is held during a particularly busy time of the semester, such as finals week.

HDFS Preliminary Oral Examination and SPDP

Overview

In HDFS, there are two parts to the Preliminary Oral Examination. **Part 1** consists of successfully defending an electronic HDFS Student Professional Development Portfolio (SPDP) that the student maintained over the course of graduate study as set forth in Table 1 below. **Part 2** is successfully defending the dissertation proposal. See the [Graduate College Handbook](#) for more information. In accordance with requirements established by the Graduate College, this Preliminary Oral Examination must be successfully completed **at least six months prior to the student's Final Oral Examination.** There are no exceptions made at the Graduate College. Students defend both the SPDP and dissertation proposal during the Preliminary Oral Examination meeting. The [Preliminary or Final Oral Exam Request](#) must be completed **3 weeks** prior to the scheduled meeting.

Part 1: Student Professional Development Portfolio (SPDP)

Purpose and Administration of the HDFS SPDP

The intent of the electronic HDFS SPDP is to demonstrate a PhD student's scholarship in the areas of research, teaching, and outreach. The development of the HDFS SPDP will also aid the student's overall academic experience and career preparation. The Graduate Faculty in the Department of Human Development and Family Studies has laid out **a set of MINIMUM portfolio requirements** as displayed in Table 1 below. A projected timeline is provided for students; however, students may complete tasks sooner than presented on the timeline. In addition, these are the MINIMUM requirements of a PhD student to be admitted into candidacy; **students are encouraged to go beyond these requirements in areas of their specialization and in line with their career aspirations.**

Evaluation of the HDFS SPDP

The evaluators of the HDFS SPDP will include the student's Major Professor and APC. The student's Major Professor and APC may set forth additional requirements to the SPDP.

Students must submit all components of the SPDP in a comprehensive form outlined in Table 1 below in addition to their dissertation proposal to their committee at least two weeks prior to the Preliminary Oral Examination Date. At the Preliminary Oral Examination, the student's SPDP will be critiqued and examined by the Major Professor and APC members.

Please Note: That beyond the review of the SPDP at the student's Preliminary Oral Examination, each year students will be required to submit their Curriculum Vitae and Annual Graduate Student Evaluation Form to the DOGE during spring semester (see Annual Evaluation, **Appendix H**). This information will be provided to the Graduate Faculty during the Annual Review of Graduate Students held in spring of each year. This information will be used as part of the evaluation of tracking the student's progress throughout the program, including meeting the minimum SPDP requirements.

Part 2: Preliminary Oral Examination of the dissertation proposal

Required Format for the Preliminary Oral Examination

Under the supervision of the Major Professor, the student will prepare a proposal that must include, **at a minimum, the first three sections/chapters of the dissertation for review by the APC prior to the student's preliminary oral examination.**

For a quantitative dissertation, the proposal shall consist of: **1) an Introductory section/chapter** (i.e., Problem statement, Significance, and Rationale); **2) a section/chapter reviewing** relevant theory, previous research, and specific research questions or hypotheses; this section must include a substantive review of the literature; **and 3) a section/chapter dealing with the proposed methodology** for the dissertation (i.e., participants, measures, procedures). The methods should be detailed and include a thorough data analysis plan.

For a qualitative dissertation, it is recommended that proposals be as definitive as possible. Even though specific details will emerge, develop, and unfold as the investigation is taking place, preciseness at the proposal stage will greatly enhance the research process. For a qualitative dissertation, the proposal shall consist of **1) an introductory section/chapter** (i.e. problem statement, significance, and rationale, **2) a section/chapter reviewing relevant theory**, previous research, and specific research questions; **and 3) a section/chapter dealing with the methodology** for the dissertation and proposed methods.

Multiple Manuscript (or Alternative Format per the Graduate College) for Thesis/Dissertation

If the student is following the Multiple Manuscript Format, also referred to as the alternative thesis/dissertation format, the Major Professor may ask to have additional sections/chapters included beyond those required sections listed above. Ask your Major Professor for previous examples from former HDFS graduate students. In addition, examples can be viewed at <http://lib.dr.iastate.edu>.

Evaluation of the Preliminary Oral Examination

Evaluation of the Preliminary Oral Examination will be based on the APC's assessment of the SPDP and dissertation proposal. Scoring criteria available from the Graduate College include "pass," "conditional pass," or "no pass." If a "conditional pass" is given, the requirements for successful removal of the condition must be detailed on the Report of Final Oral Form. **Additionally, if there is a "conditional pass" or a "no pass," a memo to the Graduate College, and signed by all members of the APC, must accompany the form fully explaining the basis for the "conditional pass" or "no pass."** If a "no pass" is given, the student will be dropped from the PhD program.

Right to Appeal HDFS SPDP and Qualification Preliminary Oral Examination Results

(Passed by HDFS Graduate Faculty, March 2005). Any graduate student has the right to appeal the results of this examination process. Appeals should be made in accordance with the ISU Graduate College Appeal Procedures (see Graduate College Handbook/website).

Time limit for Passage of the HDFS Preliminary Oral Examination

To assure satisfactory progress in the PhD program, the following time limits are required for students:

- PhD students entering the program with a MS degree must take and pass the **Preliminary Oral Examination no later than the end of the 4th semester of PhD study.**
- PhD students entering the program with a B.S. degree must complete the MS degree and pass their **Preliminary Oral Examination no later than the end of the 8th semester of graduate study. Summer enrollment is not counted.**

If a student fails to make sufficient progress, they may be put on probation with stipulations dictated for each individual case as determined by the graduate faculty at the annual review of students.

Administration of the Preliminary Oral Examination

Administration of the Preliminary Oral Examination is the responsibility of the student's APC. **All CORE academic plan coursework must be completed before taking the Preliminary Oral Examination.** The scheduling of the student's Oral Examination will be decided by the student and the Major Professor. In the event a student has declared a minor, all requirements involving a written examination for the minor must be completed before scheduling the Preliminary Oral Examination. The representative for the minor area is in charge of administering those requirements (e.g., if a written examination is required). A request for Preliminary Oral Examination must be submitted electronically to the [Graduate College](#) at least **3 weeks** prior to the requested date.

Table 1: Minimum Requirements for MS/PhD Portfolio & Suggested Timeline

	Year 1	Year 2	Year 3 (Year 1 PhD Only)	Year 4 (Year 2 PhD Only)	Candidacy Evaluation	Graduation
Required Steps	Academic Plan/Major Professor	Thesis Proposal & Defense	Academic Plan/Major Professor	Dissertation Proposal & Candidacy	Passing Dissertation Proposal	Dissertation Defense
	CV Development	CV Development	CV Development	CV Development	CV Development	CV Development
	Portfolio	Portfolio	Portfolio	Portfolio	Portfolio Submitted at Dissertation Proposal	Final Portfolio Submitted at Dissertation Defense
				Core Coursework Completed	Core Coursework Completed	Core Coursework Completed
	Annual Evaluation	Annual Evaluation	Annual Evaluation	Annual Evaluation	Non-Probationary Status	Fulfilled Graduation Requirements
Research		Presentation Submitted	Presentation Submitted	Presentation Submitted	3 (2) Presentations Submitted	4 (3) Presentations Submitted**
			Manuscript Completed	Manuscript Submitted	1 Manuscript Submitted	2 Manuscripts Submitted**
						1 Grant Proposal, Program Evaluation, or Policy Brief
				Research Statement	Research Statement	Research Statement
				Teaching Philosophy	Teaching Philosophy	Teaching Philosophy
				Teaching Internship/ Experience	Teaching Internship/ Experience in Progress or Completed	Teaching Internship Completed
Preferred But Not Required						
Professional Affiliation	5 (3) Years of Professional Membership					
Teaching/ Outreach						1 Independent Instruction (Syllabi and Evaluations submitted with Portfolio); 2 Teaching /Outreach Experiences
Research	Discuss research priorities with MP and academic plan committee (APC) to determine personal goals and progress.					
Service and Leadership		Service/ Leadership Experience	Service/ Leadership Experience	Service/ Leadership Experience	3 Service or Leadership Experiences	4 (3) or more Service/Leadership Experiences
Other Professional Experiences	Discuss professional priorities with MP and APC to determine personal goals and progress.					
**Notes: (1) Documentation for all information contained in SPD is required. (2) Tasks may be completed ahead of time. (3) Three-Year PhD Requirements are contained in Parentheses. (4) Two presentations must be first-authored. (5) At least one manuscript must be first-authored.						

Teaching/Outreach Experience May Include:

- Full responsibility for a second class
- Primary responsibility for a programmatic series of 4 to 6 presentations for local or state agency
- On-going clinical/work/outreach in an institutional setting

Service/Leadership Experiences May Include:

- Reviewing proposals for presentations or publications
- Serving on departmental, university, community, state, professional organization committees, Graduate Student Network, or Graduate and Professional Student Senate
- Belonging to or serving on professional or organization boards
- Volunteering at state, multistate, or national conferences
- Being appointed or elected for committee involvement in state, multistate, or national organizations
 - Moderating a session at a state, multistate, or national meeting

Dissertation

All graduate theses and dissertations submitted to ISU must comply with the requirements established by the Graduate College, as stated in the current Thesis Manual found on the website link [Dissertation/Thesis Home](#). The Graduate College reviews the electronically deposited final thesis or dissertation and approves the final format before signing the final Approval Slip. Staff is available to advise students on formatting problems they may encounter, but there is no formal format check prior to the electronic deposit, so be sure your final version is really in excellent shape. A word to the wise, finish your dissertation defense several weeks before the Graduate College deadline in order to allow time for revisions and for the electronic deposit. If you miss the deadline, you will not graduate.

Because all dissertations are cataloged in the ISU Library, formatting requirements are very exact. The Center for Communication Excellence (affiliated with the Graduate College) is a great resource. They offer several informational thesis/dissertation sessions and checks.

Dissertation data based on human subjects research must come from participants who have voluntarily consented to participate in a research study. The data must come from projects that have been reviewed and approved by an Institutional Review Board (IRB) or deemed not human subjects research by federal regulations. To omit this approval jeopardizes all research funding to ISU from federal sources. IRB approval **cannot** be given retroactively. When using secondary data or if you are unsure that your project is human subjects research, consult the [Office of Research Ethics](#) to determine if you need approval. If your project is deemed “not human subjects research” from the self-test, print a copy of the resulting determination and include it in your Appendix.

All personnel listed on a human subjects form must have completed CITI training and be affiliated with ISU in the CITI system in order to be added to any research protocol with human subjects. Go to the Human Subjects Training website and follow the instructions for required training. Please Note:

THE MAJORITY OF HDFS STUDENTS WILL COMPLETE THE SOCIAL AND BEHAVIORAL RESEARCH TRACK EVEN IF THEY ARE USING BIOMARKERS.

For student submissions, the Major Professor or supervising faculty member's contact information must be included on the consent form. The [IRB website](#) contains all information about training and the approval process.

Interdepartmental Majors with HDFS as the Home Department

Here is the link for ISU Grad College Handbook, Ch 4: <https://www.grad-college.iastate.edu/handbook/chapter4-degrees>

Home Department Curriculum and Course Requirements

Core Requirements for graduate students whose home department is HDFS

		PhD Core Total*	24

Approved by Graduate Faculty Spring 2015, Effective Fall 2015.

Please Note: Elective Credits Policy for HDFS Graduate Students - Effective immediately for all newly submitted academic plans. (Approved by Graduate Faculty on November 2, 2015.)

Of the 15 elective credits in HDFS, up to 9 independent study credits in HDFS (5900/5910 and 6900/6910) may be counted towards your 72-credit minimum related to the PhD academic plan. Of the 9 elective credits in HDFS, up to 3 independent study credits in HDFS (5900/5910 and 690/6910) may be counted towards your 32-credit minimum related to your MS academic plan.

Student Rights and Responsibilities

Here is the link for ISU Grad College Handbook, Ch 8: <https://www.grad-college.iastate.edu/handbook/chapter8-responsibilities>

Introduction (8.1)

Environment for Student Success (8.2)

Specific Policies and Laws of Interest to Graduate Students (8.4)

Grievances (8.5)

Human Subjects Research

PRIOR TO CONDUCTING ANY research at ISU, whether it is a thesis, dissertation, independent project, or even some class projects, you need to follow two steps for certification:

1. successfully complete the human subjects training, and
2. gain approval for Human Subjects Research

Current human subjects training information can be found on the [IRB training webpage](#). Applications for approval to conduct human subjects research are electronic through [Oneaegis](#). Once you have completed the application, it is routed to the supervising faculty member, department chair, and then to the IRB office for review. Be sure you have given plenty of time for review, revisions, and approval. You should begin this process as soon as possible. Full-board reviews can take a couple of months from start to finish. You MAY NOT engage in any research activities, including recruitment, prior to approval. Approval cannot be given retroactively. Please utilize the information in the [Office of Research Ethics](#) to determine if your project is considered “*not human subjects research*,” all other projects must be approved, even if they are considered exempt. Exempt research is still under the purview of the IRB; however, it has fewer review requirements.

Any changes to an approved non-exempt research protocol (i.e., recruitment, consent, data collection procedures, measure, materials, inclusion/exclusion criteria, personnel, compensation, confidentiality) must be approved through a modification prior to the change being made. Failure to do so will result in a non-compliance case.

Please Note: A copy of your IRB approval, exemption letter or determination of “*not human subjects research*” MUST be included in the Appendix of your creative component, thesis, or dissertation.

Publishing Theses and Dissertations

Graduate students and graduate faculty are expected to publish scholarly manuscripts that contribute to the discipline. **It is important for graduate students and faculty to discuss and**

agree on authorship and publication expectations as they work together on research, including theses and dissertations. Authorship, and the order of authors, should represent substantive intellectual contributions to the study. In order to reflect the collaboration in the study design and analysis, except under very unusual circumstances, the Major Professor should be a co-author on the manuscript. **It is helpful if the discussions about authorship occur prior to the initial writing phase and that these discussions are revisited during the writing process if needed.** [Authorship Guidelines](#) are available in the Policy Library.

In order to ensure timely dissemination of findings, graduate students are expected to submit **a manuscript derived from the thesis or dissertation for publication within one year of their final defense. Occasionally the student lacks time or interest to take a major role in leading this process; therefore, it is necessary for the Major Professor to assume the primary responsibility for revising and submitting the manuscript.** Under these circumstances, and depending on the extent of the revisions required for publication, it may be appropriate for the Major Professor to become first author and the student second author. Needless to say, it is most important for the authors to communicate regarding these decisions.

Record Retention Policy

To ensure the integrity of the research process and following Federal research guidelines, the HDFS department has a policy on retention of research records, including graduate student research. As you develop your research proposal, collect/analyze data, complete, and write your thesis/dissertation, a number of records accumulate that must be saved. These records include your final research proposal, APC meeting minutes documenting changes to the proposal, human subject's approval and consent forms, and final dataset summaries/ analyses. These records are to be retained and preserved by your Major Professor for three years after completion of the thesis/dissertation. Please see **Appendix C**, HDFS Record Retention Policy, for complete details.

Awards for Research and Teaching Excellence

HDFS Outstanding Emerging Professional Award

- The HDFS Outstanding Emerging Professional Award (MS and PhD) is given annually to a graduate student who has demonstrated excellence in two or more of the following criteria:
 - Outstanding research productivity; or
 - Excellence in classroom teaching; or
 - Exceptional service/outreach accomplishments (defined as department, college, university, community, professional service).
- In combination with this distinction, HDFS awards the Outstanding Emerging Professional with a \$250 scholarship.
- Deadline: November 15.
- Application: To apply, the student must submit a CV and a written explanation (no more than two pages) of accomplishments in two or more of the criteria listed above that makes the individual worthy of becoming HDFS's Outstanding Emerging Professional.
- All applications will be placed in a cybox folder for confidential review and vote by all graduate students (except for the students who submitted material for the award). By applying, the applicant agrees to their CV and written explanation being made available to fellow graduate students. Applications will be scored on a 1-5 rating scale.
- **Please send an electronic copy of ALL the application materials (e.g., CV and personal statement of accomplishments) to DeAnn Barnes (dhbarnes@iastate.edu) by November 15.**

ISU Graduate College Research and Teaching Excellence Awards

<http://www.grad-college.iastate.edu/academics/awards/>

Each year HDFS is entitled to submit applications for the ISU Graduate College **Research and Teaching Excellence Awards**. Awards are made during both fall and spring semesters.

- In combination with this distinction, HDFS awards each of the winning recipients a \$250 scholarship.
- Deadlines are announced each semester.
- Application: *Graduate Faculty must nominate the student for the award. Graduate Students, if you feel you may be eligible for either of these awards, please speak with your Major Professor.*

A) **Eligibility for the Research Award:** The student does not need to graduate in the semester they receive the award, but they should be very close to finishing. Students need to be far enough along in their thesis/dissertation for you to recognize the qualities of excellence established by your department. Recipients of these awards must be enrolled at ISU at the time the awards are given; students who have graduated are not eligible for these excellence awards.

A student is eligible for only one Research Excellence Award per degree; however, it is possible to grant a student both a Teaching and a Research Excellence Award for the same degree during their academic career.

Research nominations consist of a letter of recommendation (usually the Major Professor) to the Graduate College as well as a copy of the thesis/dissertation and Curriculum Vitae. The nomination letter and thesis/dissertation should be given to HDFS DeAnn Barnes (dhbarnes@iastate.edu) for review by the HDFS Graduate Education Committee. The Graduate Education Committee reviews all nominations and decides which nomination will be forwarded to the Graduate College for consideration.

B) **Eligibility for the Teaching Award:** Any graduate student with teaching responsibilities and who has been on a teaching appointment for at least two terms (including summer sessions) is eligible for an award. Students do not necessarily need to be on a C-base appointment but must be at Iowa State primarily to work on a graduate degree. Recipients of these awards must be enrolled at ISU at the time the awards are given; students who have already graduated are not eligible. A student is eligible for only one Teaching Excellence Award per degree; however, it is possible to grant a student both a Teaching and a Research Excellence Award for the same degree during their academic career.

Teaching nominations consist of a letter of recommendation to the Graduate College by the nominator as well as a copy of the course syllabi, teaching evaluations, and Curriculum Vitae. The nomination letter is given to DeAnn Barnes (dhbarnes@iastate.edu) for review by the HDFS Graduate Education Committee. The Graduate Education Committee reviews all nominations and decides which nomination will be forwarded to the Graduate College for consideration.

C) Please send an electronic copy of the application materials (e.g., CV, thesis/dissertation or syllabi and evaluations) as well as an electronic copy of the nomination letter to DeAnn Barnes (dhbarnes@iastate.edu).

Resources

Parks Library

(e-Library website: <http://www.lib.iastate.edu/>)

Computer Labs

Starting in Fall 2020, all students are required to provide their own laptop (either purchased or checked out through the Library or their department). Some software is available to install on personal computers. However, all required software will be available through [VDI Computer Labs](#).

- Additional information can be found on the [ITS Computer Requirements Page](#).
- Technology can be purchased through TechCyte via their [Major Success page](#).

Laptop Computers for Check-out

Iowa State University has developed a Laptop Loaner Program to support students who may not have access to required laptop technology. Loaner laptops will be provided to current Iowa State University students through the University Library **while inventory lasts**. Students with the greatest financial need and those who have exhausted other options for financial aid will receive priority.

Please have the following information available to complete the Laptop and Equipment checkout: <https://www.lib.iastate.edu/find-borrow-request/tech-lending/laptop-and-equipment-checkout>

- University ID – nine-digit identification number provided to you upon acceptance to Iowa State University
- College – Example: Human Sciences
- System preference – Mac or PC

If you are unable to locate your University ID, contact the IT Solution Center at 515-294-4000.

Questions about the Laptop Loaner Program can be directed to ISU Tech Lending, lib-support@iastate.edu

Computer Related Problems in Graduate Assistant Offices

[CHHS IT Services](#) - Graduate Assistants may be provided offices equipped with desktop computers. The College of Human Sciences has IT staff that can help you with your computer problems. In most cases, you will receive a response back within one business day. If your problem is a higher urgency level, contact the Solution Center at 515-294-4000 and identify yourself as an HDFS graduate assistant. The Solution Center's normal business hours are from 8:00 a.m. to 5:00 p.m., Monday-Friday.

Other Resources

For a full list of available resources, please visit the [Graduate College University Resources](#) webpage.

Assistantships

A limited number of quarter or half-time research and teaching assistantships are available in HDFS. At the time of application for graduate study, applicants indicate their interest in an assistantship on the HDFS Supplemental Information Sheet. For current HDFS students, an electronic survey will be sent to collect students' requests and interests for the following summer and academic year early during the spring semester or late fall semester. ***A specific due date will be sent with the email requesting the assistantship application form be completed.*** It is possible to indicate a preference for one type of assistantship at the time of application.

Two types of assistantship support are available: research and teaching. ***A graduate assistant (GA) performs duties that contribute significantly to their graduate education. Students holding assistantships are considered to be in training, and the graduate assistantship is a form of student aid that combines training with income.*** The letter of intent will state the specific funding dates, percentage of time (.25 or .50 FTE), supervisor name, and the type of assistantship (research or teaching). The LOI may include other information specific to the appointment. Funding constraints and requirements, however, typically determine assistantship assignments. Students seeking specific assistantships should visit with the DOGE, who can facilitate the assignment if appropriate. Final decisions are made by the DOGE, Associate Chair, and Department Chair.

On or before the first day of employment, all employees hired at ISU must complete payroll forms in Workday and verify their identity at the Office of Human Resource Services, 3810 Beardshear. At this time, the employee will fill out an I-9 form, State and Federal W-4 forms, Employment Information/Equal Opportunity form, and check mailing instructions form. The employee will need to provide a federal or state photo ID/Driver's license and Social Security card or certified birth certificate or a passport to establish identity and employment eligibility.

Under the Immigration Reform and Control Act of 1986, if an employee is unable to provide the necessary documents to complete the I-9 (Employment Eligibility) Verification within three days of start of employment, he or she must produce a receipt showing that he or she has applied for the document. In order to continue employment, the employee must produce the documents themselves within 90 days of hire.

Non-United States citizens must first go to the [International Student Services Office \(ISSO\)](#), 3241 Memorial Union, on or before their date of hire to complete the Form I-9 (Employment Eligibility) Verification. He or she must then submit the completed form to the Human Resource Services Office, 3810 Beardshear, or to the employee's department to complete registration for payroll.

Although students on assistantship are assessed at the full in-state tuition rate, they may register for fewer credits. HDFS requires graduate assistants to register for a minimum of 6 graduate credits during the fall and spring semester and a minimum of 1 credit (Graduate College Policy) during the summer.

Graduate Assistants on half-time (20 hrs/wk) appointments receive a Graduate College Scholarship Credit that reduces the in-state tuition rate, up to 75% for MS students or 100% for PhD students for any semester they hold an assistantship for at least three months during fall and spring or 6 weeks during summer. For students on quarter-time assistantships (10 hrs/week), the scholarship amount is half the amount (25% for MS, 50% for PhD). For full scholarship details, see [Graduate College Handbook](#).

Benefits for Graduate Assistants

Excerpt in italics from the Graduate College Handbook: [Graduate College Handbook](#)
Benefits in addition to stipend support accrue to the graduate assistant during the appointment period. A full explanation of these benefits appears on the [Policy Library](#) website

Health Insurance

*Graduate assistants with an appointment of one quarter-time or more for at least 3 months of the fall or spring terms receive self-only health insurance coverage as a benefit of employment, **enrollment in the self-only health insurance plan is automatic**, and the cost is paid for by your department. A copy of plan information is available online at [Student and Scholar Health Insurance Program \(SSHIP\)](#).*

Dental Insurance

Graduate assistants with an appointment of one quarter-time or more for at least 3 months of the fall or spring terms are eligible for the dental insurance plan, which is partially subsidized by the university, and the employee premium will be deducted from the GA's paycheck. Enrollment can be done on Workday during open enrollment or by submitting a paper enrollment form at other times of the year. Plan information is available on the Web site at [SSHIP](#).

Prescription Drug Benefit Program

Graduate Students receive single coverage free of charge in a program that reduces the cost of prescription medication available at the Thielen Student Health Center Pharmacy. Spouse and children can receive the prescription benefit if they are enrolled in the ISU Student and Scholar Health Insurance Plan, and the payroll deduction option is chosen for payment of premium. For further information, browse the Web site at [SSHIP](#) contact the [Thielen Student Health Center](#) Pharmacy at 515-294-7983.

Dependents

Graduate assistants may also enroll their lawful spouse or domestic partner, and unmarried dependent children under age 26. A portion of the monthly premium will be deducted from the graduate assistant's paycheck when adding coverage for dependents. Dependents must be added within 30 days of your appointment date or with a qualifying event.

Note: Once you and your dependents are added to the plan, you will be required to remain on the plan until the end of the policy year or until your appointment ends.

For plan specifics, costs, open enrollment dates and benefits details for the health and dental insurance plans, please refer to the [Student & Scholar Health Insurance Program](#).

Student Rights and Responsibilities Related to Assistantships

A student majoring in HDFS on assistantship is required to be enrolled for a minimum number of graduate credits (6 for fall/spring, 1 credit for summer) that they hold an assistantship. In order to continue holding an assistantship in HDFS, the student must make satisfactory progress towards completing the degree by, for example, completing coursework with grades of B- or better and receiving satisfactory evaluations of performance in the assistantship by the supervisor as well as during the annual student evaluation. Assistantship supervisors must meet with graduate assistants at the end of each semester to give the assistant both written (**Appendix F**) and oral evaluation of performance; copies of the written evaluation, signed by both the supervisor and the student, are provided to and signed by the Department Chair.

MS students majoring in HDFS are eligible for department assistantships for two calendar years (4 semesters) following their enrollment in the HDFS graduate program; PhD students are eligible for department assistantships for three calendar years (6 semesters) following enrollment in the HDFS graduate program. However, a student who remains at ISU for both the MS and PhD program is eligible for departmental assistantship support for a total of five consecutive calendar years (10 semester's total) following enrollment in the MS program. This period of eligibility is the same for students holding quarter-time and half-time assistantships.

Please Note: Summer appointments are not counted in semesters of eligibility.

Graduate students seeking assistantship support are expected to work with their Major Professors to complete their graduate studies within this period of eligibility. After the period of assistantship eligibility, graduate students who have not completed their program are expected to find alternate sources of financial support.

Students receiving an assistantship are under the supervision of a faculty member, who assigns work to the student. Students in quarter-time assistantships are expected to work 10 hours each week; students in half-time assistantships are expected to work 20 hours each week. If the supervisor has no work for the student during one week, the unused hours cannot be demanded in a later week unless previous arrangements have been made and these arrangements are consensual. If the weekly workload exceeds the assistantship hours on a consistent basis, the student should discuss the situation with their supervisor. If the overload continues, the student should consult with the DOGE and/or the Department Chair. In order to define/clarify the expectations of both parties, it is often useful to discuss what must be done, by what deadline, and by whom. It is generally a good practice to keep a record of hours worked on assistantship.

Students on assistantships are university employees and are expected to follow all university policies governing interactions with other students, including the discrimination and harassment policy (<http://policy.iastate.edu/policy/discrimination/>). By keeping your supervisor informed of major coursework due dates, you may be able to avoid overloading yourself by negotiating for major work deadlines to fall at times when course loads are at a minimum. Arrangements for leave of absence are made between the graduate assistant and the assistant's supervisor. When a graduate student employee needs to be absent either for personal reasons or

illness, the supervisor will accommodate that need. At the same time, the graduate assistants should attempt to plan personal leave so that it does not interfere with or cause neglect of duties associated with his or her appointment. Supervisors of graduate assistants are responsible for ensuring that their assistants do not exceed reasonable limits for leave.

General Information

Nearly all the information you will need is available on the ISU website.

The following information is provided for your convenience and ease around campus. We update this hard copy once a year, so the information is subject to change. For more detailed information, it is best to call the office of interest or check their website for the most current information.

Registration

(Excerpt in italics from the Graduate College Handbook, Chapter 2)

All students who attend classes at ISU must register and pay assessed tuition and fees. The ISU Office of Registrar's Web site is the official source of information about registration for all students at ISU. Specific dates for registration are listed:

- *on the Registrar's Web page at [ISU Registrar](#),*
- *on the University Calendar [ISU Academic Calendar](#),*
- *in the Iowa State Daily [Iowa State Daily](#), and*
- *on many department bulletin boards.*

Registration for summer session should be completed during the spring, at the same time as registration for fall semester.

Transcripts

Transcripts are available from the Registrar's Office in 214 Alumni Hall. There is a small fee charged to have an official copy sent directly to another institution. The request form is available on the Registrar's homepage [Transcript Request](#). You can also print an unofficial copy of your transcript through your Workday account.

Grades and Records

The grading system is described in the [Graduate College Handbook](#). Any incomplete grades given will automatically change to a grade of F if not resolved after one calendar year, even if the student is not enrolled. All incomplete grades must be resolved before graduation.

Forms

Throughout your graduate program, you will be filling out many forms. A listing and a description of these forms are included in Exhibit 3. [Graduate College Forms](#) should be downloaded/completed at the time that they are needed to ensure that the most recent version is used. You are responsible for submitting the forms by the deadlines set by the Graduate College. Deadlines for each upcoming semester are on the [Graduate College Calendar](#) website. Examinations have had to be rescheduled and delayed for students who failed to file the academic plan or the Request for Examination form at the required times or in the required sequence. Data collection has been postponed for students who failed to file for Human Subjects Committee Approval of their research proposal. Therefore, it is very important that ***you*** keep track of where you are in the graduate program and what forms you have yet to file.

Please Note: When you receive approval to have a preliminary oral exam or final oral exam, required forms and links for electronic forms are sent to the student and the Major Professor. The electronic forms will route through the Major Professor, committee members, DOGE and graduate college as specified on the forms.

Building Access Services

The department will request keys and/or access cards for Graduate Assistants to their assigned office space, along with a building key or access card. All keys/cards remain the property of the university and must be returned to Facilities Planning and Management when you move out of an office and/or graduate.

Lost or Stolen keys/cards should be immediately reported to your department key/card coordinator and the Key Desk upon discovery. A \$30 fee will be assessed for each lost or unreturned key. The Department Key Coordinator (DeAnn Barnes) can run a report of the current keys assigned to you.

Scheduling Conference Rooms

The HDFS department has several conference rooms in Palmer that graduate students can reserve for committee meetings.

Please Note: Send an email request to dhbarnes@iastate.edu to schedule a meeting room. Be sure to schedule early because room reservations fill up quickly, and space is limited.

Virtual Meetings and Members at a Distance

For preliminary and final oral exams, the student and major professor(s) should discuss the choice of modality with the committee, and for remote or hybrid meetings, arrange for facilities and equipment to ensure full video and clear communication.

For each of these instances, please refer to the requirements and procedures in the [Graduate College Handbook section on Final Oral Exams](#). The HDFS Graduate Program Assistant can help you with technology needs for virtual meetings and members at a distance.

Address Changes

1. You are responsible for updating your address & telephone changes with ISU.
 - Login to Workday, go to the Student account, and choose address change.
2. Also, notify the HDFS Graduate Program Assistant of your name, address, and telephone changes.

Automatic Direct Deposit Change

To change your direct deposit, do the following:

- If you want to change the direct deposit destination of your payroll check, enter Workday, click on Pay; Payment Elections, Add account for Direct Deposit, enter routing number, account number, and account type, and click submit. The change will be effective after the date stated.

This account will be used for all payments from Iowa State University, including, but not limited to, Title IV financial aid and payroll.

Graduate Student Housing

The Department of Residence offers a variety of options for graduate students, including some dormitory spaces limited to students over 21 years old and several apartment buildings that are tailored for adult students and families. See the [Department of Residence](#) website for current information.

International Students & Scholars

(Please see: [ISSO](#))

International Students & Scholars Office Mission Statement

The mission of the International Students and Scholars Office at Iowa State University is to facilitate the seamless integration and success of international employees, scholars, and students by providing expert services, guidance on immigration compliance, and comprehensive support around unique international challenges. We assist students in the maintenance of their immigration status, U.S. employment regulations, and provide support with social, cultural, financial, and personal concerns. Staff in the Scholar and Employment Unit work with ISU departments to bring scholars to campus by preparing immigration documents or filing immigration petitions and by providing guidance on employment regulations. Through our services, we aim to ensure that all international scholars and students have the necessary support, resources, and guidance to thrive academically and personally during their tenure at Iowa State, as aligned with the [mission of the University](#) and [Division of Student Affairs](#).

International Students & Scholars Office Organization

The area most frequently used by international students, scholars, and their families is the International Students & Scholars Office (ISSO) located in Room 3241 Memorial Union. The International Student Advisers (ISA) working in ISSO that assist international students at Iowa State with maintenance of their immigration status, U.S. employment regulations and provide support with social, cultural, financial, and personal concerns.

Not sure about this part: Staff in the Scholar Unit of ISSO work with ISU departments to bring scholars to campus by preparing immigration documents or filing immigration petitions and by providing guidance on employment regulations. These staff members also advise scholars on maintenance of their immigration status, U.S. employment regulations and provide support with social, cultural, financial, and personal concerns.

Update: ISSO awards several scholarships to students who have demonstrated financial need, which are available on its website, and has a list of additional resources available to international students and scholars. It provides a worksheet to help with expenses during students' time at school and a guide to avoiding scams.

ISSO can help international students fill out an invitation letter so family and friends can visit them in the U.S. as well as assist with any tax concerns.

International Graduate Students: English Language Proficiency

HDFS recognizes that international students may experience additional stressors as they navigate a new environment, language, and culture. We are here to support you. Below we outline university requirements for language proficiency and some requirements that are specific to PhD students in our department due to teaching internship duties. In addition, you will find links to resources for English skill development. We recommend that you ask your major professor and other graduate students about opportunities that would support your individual professional development.

I. English Placement Test (EPT) for all international graduate students

All international graduate students whose first language is not English and who are not enrolled in distance-only programs must meet the Iowa State University English language requirement. The English Requirement is different from the minimum English proficiency needed for admission to ISU. Students who are admitted to ISU may be required to take English classes to meet this requirement. They are required to take the EPT as soon as they arrive. The English department will guide you to the appropriate English courses needed. These English courses must be completed during the first year of study, and registration holds are placed if students don't register for these courses during the first year of study. Go to <https://apling.engl.iastate.edu/english-placement-test/> for information about registration, exemption, and other information about the EPT.

II. Oral English Certification Test (OECT) for international teaching assistants

For international students on teaching assistantships, you are required to take the OECT before or at the start of the semester you begin your teaching duties. The Center for Communication Excellence (CCE) will guide you on the appropriate English courses needed. These English courses must be completed during the first two semesters from the time of appointment. Go to <https://cce.grad-college.iastate.edu/speaking/oect-for-itas> for more information about the registration, exemption, and other information about the OECT.

HDFS follows the recommended guidelines related to teaching duties and coursework set through the CCE in that international graduate students with teaching assistantships should work toward a Conditionally Certified status (Level 2) and enroll in English 180D at a minimum. The CCE website provides information about how to interpret results from the OECT <https://cce.grad-college.iastate.edu/speaking/oect-for-itas/results>.

In addition to these university requirements, HDFS requires all PhD students to engage in a teaching internship experience. Prior to enrolling in this course HDFS 6910A, international PhD students need to be at a Conditionally Certified status (Level 2) and have completed at least one semester of English 1800D. In the rare instance that a student does not receive a Level 2 status and has taken the series of English 1800 courses (A-D) as recommended by the CCE, they can work with the DOGE and CCE for alternative options.

Students should receive advising from their major professor and/or the CCE to determine if they should become Fully Certified (Level 1). In HDFS, this is required to teach independently in-person.

International students who do not have teaching-related responsibilities are encouraged to check out the resources available through the CCE <https://cce.grad-college.iastate.edu>. There are many different opportunities to support written and oral English skills for your professional growth. In addition, the Center for Excellence in Learning and Teaching (CELT) provides numerous opportunities for enhancing teaching-related skills for all graduate students, faculty, and staff <https://celt.iastate.edu>.

Student Health Center

(Please see <http://www.health.iastate.edu/>)

Thielen Student Health Center, located next to State Gym and Beyer Hall on campus, provides all of the same services that standard medical clinics can. Students can be seen for illness or injuries, have tests done, receive immunizations, get a physical or check-up, have their prescriptions filled, receive physical therapy, and more.

To schedule an appointment, please call us at [515-294-5801](tel:515-294-5801).

Student Legal Services

(Please see [Student Legal Services \(SLS\)](#))

Updated version:

Funded by Student Government, the mission of the Student Legal Services Office at Iowa State University is to provide professional, confidential legal advice and support to college students, free of charge, when no conflict of interest with the university exists. Our office is committed to assisting students in addressing their legal concerns, ensuring their access to legal resources, and promoting their academic and personal success. When appropriate, we facilitate referrals to community legal services to further support our students. Our dedication aligns with the [mission of the University](#) and [Division of Student Affairs](#), emphasizing the importance of serving all students and contributing to their overall success throughout their college experience.

Financial Aid and Other Funding

Graduate Student Research Grant Program

The Department of Human Development and Family Studies, as part of its mission to educate and support the learning experience of its graduate students sponsors a Graduate Student Research Grant Program (GSTDRF). The fund is to support mini-thesis/thesis (up to \$500) or dissertation (up to \$1000) research. For application requirements and review process, refer to **Appendix K** of this handbook.

Scholarships

Newly admitted and continuing graduate students in the Department of Human Development and Family Studies are eligible to apply for scholarships made available by donations to the College of Human Sciences. Scholarships for continuing students are awarded on the **basis of academic excellence and research accomplishments**. Because of limited funds and stiff competition, the department and college graduate scholarship committees have only considered continuing **student applicants with a 3.7 GPA or better**. Students need to complete the application online: <https://hs.iastate.edu/graduate-students/funding-graduates/scholarships-graduates/>. CVs and any additional supporting documents may be sent

directly to the Graduate Program Support Staff. The deadline for scholarship applications is March 1. The HDFS Graduate Education Committee will review and rank all applications. Students receiving the full scholarship award are required to be enrolled each semester for 4 or more graduate credits, including research credits.

Student Loans

A variety of loan programs are available to eligible students. For details, contact the Financial Aid Office, 0210 Beardshear, (800)478-2998, or (515)294-2233, or [ISU Financial Aid](#). Information on funding for graduate study and graduate research is also available on the [Graduate College](#) homepage website (Financing Graduate Study).

Professional Advancement Grants ([PAGs](#))

(Please see: <http://www.gpss.iastate.edu/>)

Professional Advancement Grants (PAG) are provided to graduate and professional students by the Graduate and Professional Student Senate (GPSS) to help defray expenses related to professional meetings and conference travel.

HDFS Travel Money

HDFS Travel Money

Contingent upon fiscal funding, HDFS awards travel money beyond the Travel PAG. **HDFS offers up to \$500 (one time per fiscal year) for HDFS graduate students traveling to present a refereed paper or poster, preferably at a national or international conference.** HDFS does not have the funds to support students who are only traveling and not presenting.

HDFS students must first apply for GPSS Travel using the PAG form. After the GPSS Travel PAG has been approved, please contact the HDFS Graduate Program Staff. At this time, HDFS will approve or deny the addition of up to \$500. If the student is not awarded PAG funds, HDFS will review the application and determine on a case-by-case basis if HDFS travel funds will be awarded. HDFS travel money is only awarded after you have followed the PAG application process.

Please Note: All PAG forms must be submitted as soon as possible after receiving confirmation of presentation and at a minimum of 3 weeks prior to the travel date. In addition, all reimbursements must be completed within 30 days of travel.

Transportation

Ames Public Transportation

The Ames Transit Agency (Cy-Ride) provides bus service for the City of Ames. All Cy-Ride routes are free for Iowa State students carrying a current ISU ID CARD. Maps and timetables are available at the Cy-Ride Office (1700 University Blvd) and the CyRide website [CyRide](#).

Outside Ames Transportation

Intercity bus transportation in Iowa is provided by Greyhound Lines, Jefferson Lines, and Burlington Trailways. A map of their routes can be accessed from the Cy-Ride website [Regional Transportation-CyRide Website](#).

The closest commercial airport to Ames is the Des Moines International Airport, located 45 minutes south in Des Moines. CyRide operates a shuttle service to and from the Des Moines Airport for certain university breaks. Check the Des Moines Airport Shuttle schedule from the Cy-Ride website. Driving directions to the Des Moines International Airport can be found at [dsmairport.com](#). Public transportation to and from the airport can be arranged through the following businesses:

- Executive Express (888 522-9899)
- Cyclone Cab (515 232-1343)
- Big Dog Cab (515 608-8271)
- Fitz's Taxi (515 451-8769)
- Des Moines International Airport (515 256-5050)

Parking

Parking on campus is limited but is available to commuter students living outside of the Ames city limits. Graduate students whose research necessitates the use of a car may submit a letter requesting a commuter permit to the manager of the parking system. Call the Department of Public Safety (294-3388) for more information or check their website [ISU DPS](#).

Paid parking is available in the ramp adjacent to the Memorial Union for cars and motorcycles. Approximately 100 pre-pay parking stalls are available in the lot next to the Armory and in several other locations throughout campus.

Bicycles

All bicycles on the ISU campus must be registered and/or licensed through Iowa State University or the City of Ames. Registrations are available free of charge at DPS offices ([ISU DPS](#)), Ames City Hall, all local bicycle shops, and various businesses throughout Ames. If a bike is lost or stolen, registration will be a way to identify the proper owner.

Bicycles must be parked in the fixed racks provided. They must not be parked on lawns or sidewalks, or chained to trees, light poles, fences, benches, or other fixtures. Bicycles considered abandoned or improperly parked may be impounded by cutting and removing the locking devices, when necessary. Bicycles parked on disability access ramps will be immediately removed and impounded.

Bicycles may not be taken inside any building except when authorized by the Department of Public Safety.

The City of Ames requires that ISU students have a registration sticker for their bicycle. These are available from City Hall located at 6th and Burnett. Riding bicycles on campus sidewalks is prohibited. Bike trails and bike racks are available throughout campus.

Associations and Organizations

Graduate Student Network (GSN)

The Human Development and Family Studies Graduate Student Network (GSN) is a departmental organization open to all graduate students with a major or minor in HDFS. Although the main purpose of this organization is to foster student interaction, it makes many contributions to HDFS through the combined efforts of the members. GSN is actively involved in projects and programs to promote the importance of human development and family studies to all parts of the academic community. This group is one of the best sources of information important to graduate students in the HDFS Department.

Funding for HDFS-GSN projects comes from grants from the Graduate Student Senate, financial assistance from HDFS, university grants, and volunteer efforts of the staff. Some past projects have included the support of the Departmental Seminar Series, which brought many distinguished speakers to campus, community service projects, and sponsorship of graduate student/faculty social events. GSN elects officers during the latter part of the Spring Semester. Meetings are held approximately once a month, with the day and time set at the beginning of each new semester. **All HDFS graduate students are urged to participate in this organization.**

Graduate and Professional Student Senate

(Please see: [GPSS](#))

The Graduate and Professional Student Senate (GPSS) is an elected governing body through which graduate and professional students express their concern for the welfare of graduate and professional students at Iowa State University, develop and disseminate ideas for the improvement of graduate and professional education, and contribute to the formation of relevant University policies. Founded in 1970, it is the recognized independent representative body of graduate students at ISU; it is charged with representing the graduate and professional students' perspective on campus issues and serving as a liaison between graduate/professional students, the university administration, and the Board of Regents.

E-mail, University Communications

(Please see from the Policy Library website: <http://policy.iastate.edu/policy/email/>) Effective: 10/01/06 Updated/Revised: November 29, 2012).

Introduction

Iowa State University must be able to communicate quickly and efficiently with faculty, staff, and students in order to conduct university business. Email is an acceptable and appropriate medium for such communications.

Policy Statement

Unless law, contract, or other university policy prohibits email or requires another form of communication, Iowa State University may send communications to faculty, staff, and students by email to their Iowa State University email address. It is expected that the email will be received and read by the recipient within a reasonable amount of time, as email communications may be time-sensitive. This includes communications intended to meet the academic and administrative needs of the university, including business that is critical to the operation and function of Iowa State University.

Security & Privacy

Email communications must comply with federal and/or state regulations and university policies including the Acceptable Use of Information Technology Resources, and Electronic Privacy. Iowa State University will not request personal confidential information such as social security, credit/debit card, or bank account numbers be returned by email. Faculty, staff, and students are responsible for keeping their email passwords confidential, and must not share their password with others or leave it exposed.

University Email Address

University email addresses are of the form [Net- ID]@iastate.edu and are included in university directory information. Current Iowa State University students are expected to have a University Net-ID and email address. Students may request that their university email address not be made public by completing a no information release request in the Office of the Registrar.

University faculty and staff are expected to have a University Net-ID and email address unless other provisions for university communications are made by their unit. Unit heads that have employees without email access, such as some Merit and temporary employees, must make reasonable accommodations for an alternative means of communication. Faculty and staff will choose a University Net-ID (email address) as part of the hiring process. The University Net-ID address will be suspended after the effective date of termination or separation from the university. A Net-ID may be sponsored by a university administrative officer or delegate for the purpose of carrying out university business.

Forwarding

Although students or employees may choose to forward their university email address to another email address, forwarding is not recommended. There is a risk forwarded email may be lost or

blocked. Problems with forwarded email will not absolve the individual of responsibilities associated with university communications sent to their university email address.

Instructional Use

Faculty will determine how electronic communication, including email, will be used in their classes, and must specify those requirements in the course syllabus.

I. HDFS Departmental/College of Human Sciences Forms

Graduate Assistantship Performance Evaluation

This evaluation is completed each semester you are a graduate assistant. The assistantship supervisor completes the form and they discuss it with you. You may or may not agree with the evaluation, but it is imperative that your supervisor reviews the evaluation with you. This evaluation is not part of your personnel file. The purpose of the form is to evaluate the work you have done on the current assistantship and to offer guidance for assigning future assistantships.

Selection of a Major Professor

Students submit APC, which includes the major professor, through Workday.

II. Graduate College Forms

Most forms are electronic or can be printed from the Graduate College web page

Appendix A: Teaching Internship Policy & Internships

HDFS Teaching Internship Policy - HDFS 6910A

All PhD graduate students are required to take a 3-credit Teaching Internship (HDFS 6910A) as well as the equivalent of a 1-credit teaching seminar (e.g., HDFS 6160 or CELT teaching seminars) on the basics of teaching tasks and teaching strategies.

The purpose of this internship requirement is to provide the students with a quality experience in a variety of instruction-related tasks. The goal is to prepare students to independently teach at the PhD level and ultimately to make them more competitive in their job applications. As with any other academic requirement, substitutions for this requirement are up to the student's academic plan committee and should be accompanied with a written justification.

Background and Preparation: The equivalent of a 1-credit course (i.e., 15 hours) should be taken prior to or concurrent with the Teaching Internship. The 1-credit equivalent may include workshops and discussions offered by departments and groups such as the Center for Excellence in Learning and Teaching. If not taken for credit, students should submit a summary of the activities undertaken to achieve knowledge in the areas of course construction, course management, assessment, delivery techniques, and student resources and issues.

Internship Experience: The internship grading will be on a Pass/Fail basis. Duties of the teaching intern (TI) are decided upon by the course's instructor and the student, however, the tasks should encompass activities in the five substantive areas mentioned above. Examples of TI tasks include actual teaching of one or several lectures, preparing and/or administering exams and/or assignments, grading of exams and/or assignments, preparing students for exams, and assisting with online and technology-related course components.

Applying for an Internship: Students will inform the HDFS Departmental Chair and the Director of Graduate Education about the undergraduate courses they prefer for their internship in the Spring of the previous year. Students may consider courses related to their content interest areas as well as courses which provide reflect the variety of instructional settings available and offer unique opportunities (e.g., large lecture-based courses, upper-level courses and seminars, online offerings). The Chair and the DOGE will consult with the instructors of the courses about their willingness and readiness to have interns in their courses. Policy approved by the Graduate Faculty, March 22, 2010. This policy will be effective for PhD student Program of Study forms with Graduate College approval dates after August 23, 2010.

In addition to HDFS 6910A, PhD students are required to take an additional three credits in either 691B, Research or 6910D, Professional Experience.

Potential Topics and Activities

Content Area	Topics	Activities
Construction and class type/needs	Syllabi components Learning objectives Competencies Outcomes assessment Flexibility and timing Team teaching Large lecture Seminar and upper level Required vs. elective	Understand class in context of larger curriculum and audience (e.g., service course, licensure requirement) Identify key learning objectives and competencies Discuss practical aspects of delivery (e.g., midterm calculation, other demands for instructor)
Course management	Communication with students Classroom interactions Fostering engagement Disruptive behavior Discussing difficult/sensitive topics	Creation of student information sheet Research best practices Test out varying techniques in the classroom
Assessment	Test and assignment construction Assessment of multiple learning styles	Write a variety of exam questions (e.g., multiple choice, essay) Grading Item analysis Course pre-post test Scholarship of learning and teaching project for manuscript or poster presentation
Delivery techniques	In-person, online, & hybrid Collaborative learning Service learning Field trips Guests Real-world examples and application	Content development Content presentation in person and online Incorporation of technology, clickers, etc
Student resources and issues	Confidentiality Diversity Learning challenges Working with athletes Incompletes Academic integrity and the process Seeking outside help for instructor and student	Research resources Disseminate to the class Discuss experiences with instructor and others
Professional development	Principles of learning Student evaluations and feedback Peer feedback (e.g., teaching observations) Department, college, & university protocols for course development	Develop elements of a teaching portfolio Document teaching efforts and results (e.g., reflection, instructor and student feedback, examples of students' work, assignment, web-based activity)

Readings and Resources

<http://www.celt.iastate.edu/>

<http://www.preparing-faculty.org/>

Suggested Best Practices

- Add a note to the course syllabus explaining the role of a TI
- Arrange a regular weekly or biweekly meeting time for the TI and instructor
- TI should attend departmental teaching “teaching Circles” as well as CELT events
- TI creation of a journal to document activities and reflect
- Discuss expectations of the TI
- TI should attend the course on a regular basis
- TI should receive feedback on his or her performance to be used for formative feedback and documentation of professional development
- Conduct mid and end-semester evaluations separately for the instructor and the TI. Example evaluations are available from the DOGE.

HDFS 6910B: Research

The HDFS 6910B Research Internship is a supervised experience in which the student will participate in various aspects of the research process, e.g., writing a proposal, collecting and analyzing data, writing research papers. This internship may be waived by the APC only if the student has had extensive research experience.

HDFS 6910D: Professional Experience

The HDFS 6910D Professional Experience Internship is a supervised experience in which the student gains practical competence working in some applied setting such as with a human service’s agency or ISU Extension. This internship may be waived by the APC only if the student has had extensive experience in professional settings.

Appendix B: Confirming your Major Professor and Selecting an APC

- 1) As you begin graduate study, it is essential to realize that you are the primary individual responsible for your progress in and your satisfaction with graduate school. However, you are not expected to bear this responsibility alone. The working relationship that you develop with your Major Professor and other committee members can be a valuable resource, not only in providing guidance and suggestions as you work to complete your degree, but also in terms of aid with conference presentations, publication of articles, and future job placement. Thus, it is most important that you consider the confirmation of your Major Professor and other committee members with thought and care. The decision process is not easy and, to a large degree, is dependent on the amount of information you have at the time that you make your decision.

Please Note: That you may also have Co-Major Professors; however, HDFS Adjunct/Term Graduate Faculty must Co-Chair with a tenured or tenure-track HDFS Graduate Faculty member (Approved by Graduate Faculty, April 2011).

The confirmation of the Major Professor, establishment of an APC, and filing of the academic plan must be completed by the end of the second semester of study or after 9 graduate credits for part time students. It is the responsibility of the student to make this request. Exceptions to this requirement (e.g., part time students) must be requested in writing to the DOGE.

- 2) Students should learn the areas of interest and expertise of the graduate faculty (e.g., HDFS 5010, HDFS web pages, interviewing faculty). The research of the students who work with them reflects some aspect of that interest.
- 3) Students should visit with other graduate students regarding a Major Professor's work and relationship style. Ask the students questions such as: (a) How does the professor relate to students as a group and as individuals? (b) What is the degree of attention the professor gives to deadlines, appointments, and turnaround time? (c) How difficult is it to schedule regular appointments with him/her in order to complete the thesis?
- 4) A student should think about what they need and expect from a Major Professor and committee members. Consider (a) Your working style: Do you work best independently or with supervision? (b) Your academic strengths and weaknesses. How much assistance will you need in written communication or statistical analyses? (c) Will the professors be available in the summer?

- 5) Students should visit with several professors to discuss research topics of mutual interest. Do not be afraid to ask questions about work style, expectations, and requirements. This is very important. This is your research and your education! Be prepared to answer questions regarding research interests as well as who are potential committee members. Explain what type of working style meets your needs.
- 6) Students should include committee members with certain strengths specifically for statistical, theoretical, or methodological support. However, committee members cannot substitute for coursework you need to take to gain statistical, theoretical, and methodological skills and knowledge! Ask your Major Professor for suggestions.
- 7) Should the student have difficulty selecting committee members, they may consult with the DOGE for HDFS or the HDFS Department Chair. It is, however, the responsibility of the student to confirm a Major Professor and select committee members.
- 8) Should the student decide to change their Major Professor, a new APC should be completed through Workday.
- 9) Should a faculty member, who had previously agreed to serve as Major Professor, wish to remove him/herself from that responsibility, the faculty member must notify the student and the HDFS Chair and DOGE in writing. In this instance the student has the responsibility and up to 3 months (based on the 9 month academic calendar) after the Department Chair was notified to find another Major Professor and complete a new APC through Workday.
- 10) Given these deadlines, whichever apply to a particular student's situation, if the student is unable to select a Major Professor despite every reasonable effort on the part of the student and the department, the student will be placed on probation by the HDFS Graduate Faculty. The probationary process is outlined in Appendix H, Review and Evaluation Student Progress.

Policy approved by the Graduate Faculty, April 22, 2002; amended, August 30, 2002.

Appendix C: HDFS Record Retention Policy (Effective November, 2001)

It is the responsibility of the Principal Investigator/Major Professor to see that the records listed below are retained in a location supervised by the principal investigator/Major Professor. These records are to be kept for a minimum of 3 years after completion of the research (i.e. completion of the thesis/ dissertation).). After 3 years, the retained records can be destroyed under the supervision of the principal investigator/Major Professor. Records regarding IRB approved research must also comply with the approved protocol.

Records to be retained:

- ☐ Final thesis or dissertation proposals. (date) _____
- ☐ Graduate student formal proposal meeting notes related to revisions of the proposal made by the APC; emails and correspondence with APC as follow up to major proposal changes after the formal proposal meeting. (date) _____
- ☐ Proposals and data that require IRB (Human Subjects) submission; proposals and data that may lead to or are intended for any kind of publication, may it be written, electronic, or verbal form. Exempt are projects that serve exclusively the education of students, e.g., student papers, and internal presentations. (date) _____
- ☐ Approved IRB form (Human Subjects) (date) _____
- ☐ Data in any form necessary for replication and documenting major results of the research should be retained electronically insofar as possible (e.g. kept on cybox). Examples of data to be retained electronically: input data files used for analyses; scanned transcripts; summaries of analyses. Confidentiality agreements will be maintained. If it is unclear what needs to be saved or any issues related to data retention arise, the principal investigator/Major Professor should consult with the Department Chairperson. (date) _____
- ☐ Signed human subjects participant consent forms (if applicable to the proposal; should be scanned for storage). (date) _____

Approved by the HDFS Graduate Faculty, November, 2001

Appendix D: Mini-Thesis Policy

Students who are admitted to the PhD program from a non-thesis program must successfully complete work comparable to a research thesis in HDFS (e.g., published research study). The admission letter to the student identifies this as a requirement in the program.

The admissions letter also states that a *student may request a review of a document that they believe is the equivalent of a research project*. In that case a two-member committee of the HDFS Graduate Faculty would review this document and arrive at a decision whether to waive the mini-thesis requirement. To select the committee, see “Guidelines” (listed below).

To meet the requirement of comparable work for a thesis, the student must provide written evidence of a successfully completed research project that is directed and approved by a two-member graduate faculty review committee within HDFS. It is highly desirable to complete this project by the end of the first year of graduate study and must be completed before taking the Preliminary Oral Examination.

Guidelines for Completing the Mini-Thesis Requirement:

A two-member committee is selected by the Major Professor and student. This committee may consist of any two graduate faculty members in the department (including the Major Professor if desired).

If the research project is completed at ISU, the student may receive 5 graduate credits of research credit (HDFS 6990) on the academic plan in addition to the 10 graduate credits required for the PhD program.

1. The two-member committee should approve the research project proposal prior to its initiation. Additionally, there must be IRB approval as appropriate. <https://compliance.iastate.edu/research-ethics-compliance/irb/>
2. The research project should result in a written document, preferably a manuscript prepared for publication.
3. The two-member committee should approve the final product as an indication that the student understands the research process.
4. A letter signed by the two-member committee should be placed in the student’s file indicating successful completion of the mini-thesis requirement.
5. The approved committee letter as well as the final written document should be placed on file with the DOGE.

Approved: May, 1996; revised August, 2000, August 2020.

Appendix E: Funding Policies and Procedures

Eligibility:

These policies and procedures apply to graduate students in the HDFS major as well as those graduate students whose home department is HDFS and funds controlled by the HDFS Department. This policy does not apply to students majoring in HDFS who have financial support from their own grants, contracts, or funding by other departments/units.

Student Needs:

Graduate support staff to the HDFS Graduate Program sends out a qualtrics to continuing students asking them to submit their assistantship requests for the coming academic year. Incoming students have a similar letter in their application packet. All requests and a summary will be available for faculty review.

Faculty Needs:

Under the direction of the DOGE, the graduate support staff to the HDFS Graduate Program contacts faculty asking them of their assistantship needs for the next academic year during fall semester.

Allocation Process:

Requests will be considered by the DOGE, Associate Chair, Department Chair, and Administrative Specialist according to the guidelines below.

Allocation Priorities:

Assistantships will be allocated according to the following priorities:

- GROUP 1 (1st Priority): Continuing HDFS students on assistantship support, with eligibility remaining.
- GROUP 2 (2nd Priority): New HDFS student applicants and new or continuing graduate students whose home department is HDFS and who are on assistantship support,
- GROUP 3 (3rd Priority): Continuing HDFS students with eligibility remaining but who are not presently on assistantship.
- GROUP 4 (4th Priority): Continuing HDFS students whose eligibility has expired.

Please Note: Students who live at a distance are not guaranteed an assistantship due to the limited number of distance opportunities available.

Matching Faculty and Student Assistantship Needs:

In so far as possible, assistantships will match student and faculty needs. However, if qualified applicants are not available in one priority group, then applicants will be considered from other groups in order of group priority. *Faculty who cannot find a qualified HDFS student may request approval from the Department Chair to appoint a student from another department.*

Criterion for Eligibility:

Eligibility is based on the number of semesters of full-time coursework a student has completed in the HDFS graduate program. Thus, eligibility is related to the number of semesters a student has been enrolled regardless of whether or not the student has received assistantship support.

- A full-time semester, counted toward eligibility is defined by HDFS as any semester in which a student registers for 6 or more graduate credit hours.

HDFS MS Student Eligibility

Master's students are eligible for assistantship support through the first two years (4 semesters) of full-time coursework after they enter the graduate program. Part-time coursework taken prior to the first application for an assistantship will be prorated for those applying for assistantship.

HDFS PhD Student Eligibility

PhD students are eligible for assistantship support through the first three years (6 semesters) of full-time coursework after they enter the graduate program.

Continuation of Assistantship Support

Please Note: An assistantship will be continued until eligibility has expired, so long as the student's assistantship performance and degree progress is satisfactory and funds remain available. Each graduate assistant will be evaluated for satisfactory performance each semester by the student's assistantship supervisor. Degree progress is evaluated each spring by the HDFS graduate faculty.

Please Note: Short term, temporary assistantship appointments (e.g., a student given an appointment who was not on assistantship appointment when admitted) do not guarantee continued assistantship support should the student still have eligibility left.

Summer School Appointments

Summer appointments do not count towards eligibility.

HDFS MS student accepted to PhD Program

Assistantship priority: Students in the process of completing an HDFS Master's degree are considered to be *new students (Group 2)* and are assigned a new assistantship score when applying for admittance into the HDFS PhD program, regardless of their previous priority status during their HDFS Master's program. They compete with other new PhD student applicants for assistantship support at the PhD level.

Allocation of assistantships to HDFS MS students accepted into, but not yet commencing, an HDFS PhD program: HDFS MS students desiring to continue on into the HDFS PhD program typically apply for admission and for assistantship support as new PhD students several months before they finish their Master's program. The awarding of a PhD level assistantship to an HDFS Master's student who is accepted into the PhD program is done with the understanding that the student's MS final oral will be completed before the PhD level assistantship starts.

If an HDFS Master's student who has been accepted into the PhD program and awarded a PhD level assistantship fails to complete the final oral before the scheduled start of the PhD level assistantship, the student may be allowed to continue on assistantship support up to one year (at the MS rate) to allow time for completion of the MS degree program. If the final oral for an HDFS Master's student accepted into the PhD program and receiving a fifth semester of support to help them finish their MS program is not completed by the end of this fifth semester, the HDFS student may be taken off assistantship support and placed in Group 3 (continuing students without assistantships). After their Master's program is completed, they may reapply and compete with other Group 3 students for assistantship support.

The assistantship stipend will not be paid at the PhD rate until the beginning of the semester following official completion of the MS degree.

HDFS Students accepted directly into the PhD program from the B.S. degree:

HDFS PhD students admitted without the MS will have five consecutive years of assistantship eligibility. Eligibility does not start over at the beginning of the PhD.

Student initiated interruption of assistantship support

- ***Interruptions due to personal/family emergencies:*** Students in good standing who, for personal/family emergencies, resign from their assistantships prior to completion of eligibility will be classified as Group 1 students (continuing students on assistantships) if they reapply for assistantship support. Such decisions will be made by the Department Chair in consultation with the HDFS DOGE.
- ***Interruptions not due to emergencies:*** Students who resign from their assistantships for non-emergency reasons, as determined by the Department Chair in consultation with the DOGE, will be classified into Group 3 upon reapplication for assistantship support, provided eligibility has not been exhausted prior to reapplication.
- ***Transfer from HDFS major to another major:*** Students on an HDFS assistantship who transfer to another major, e.g., MFCS, Sociology, Psychology, will have the HDFS assistantship terminated at the end of the semester in which the transfer occurs.

Exceptions: Exceptions to the assistantship allocation policy and procedures will be considered on a case-by-case basis.

Rationale for the HDFS assistantship timelines

The assistantship allocation policies identified above apply only to departmentally controlled assistantships.

- It is in the students' best interest to complete the graduate program expeditiously (e.g., 2 years for a MS Degree; 3 years for the PhD Degree).
- It is in the department's best interest to move students through their programs in a timely fashion so that other students can be offered assistantships, making our department more competitive.

* Additionally the Graduate College assesses graduate students on assistantship, fees at the amount equal to the full-time resident rate (9 graduate credits).

** See Appendix H. Review and Evaluation of Student Progress

Approved by HDFS Graduate Faculty, April 1993; December, 1999; May, 2002; February 2004.

Appendix F: Assistantship Evaluation Form

Please see: <https://iastate.box.com/s/sim4meozhdf55k1khn6d9rsbdr8pdpx>

Appendix G: Graduate Student Teaching in HDFS: Role and Responsibilities

Graduate students engage in teaching opportunities in 3 main ways. Throughout a PhD program, students may or may not be a teaching assistant for a course taught by another instructor. However, typically graduate students serve as a teaching intern before serving as instructor of record. *Please note that graduate students who are teaching independently are technically on a TA appointment.*

	TEACHING ASSISTANTS	TEACHING INTERNS	GRADUATE STUDENT INSTRUCTORS of RECORD
Purpose	The teaching assistantship purpose is to provide mentored teaching experiences and assistantship support.	The teaching internship purpose is to prepare students for independent teaching and provide experience with a variety of teaching related tasks	This teaching experience should provide opportunity to demonstrate independent instruction. The lead course instructor and major professor maintain a mentoring role.
Student Role	Provides support to instructor in a variety of ways and gains skills toward becoming an instructor.	Engages in a variety of activities related to teaching. Team teaching, syllabus preparation etc... Determined by student and instructor and specified in syllabus provided to DOGE.	Responsible for all course preparation and implementation with mentoring within the constraints of reasonable consistency across sections and department learning objectives. This experience should provide opportunity to demonstrate independent instruction competence.
Content Supervisor	Course instructor	Course instructor Lead course instructor provides information about how they went about selecting text books, learning objectives, course description and primary assignments in the context of that have	Lead course instructor provides information about text books, learning objectives, course description and primary assignments that have been agreed upon by faculty. Some information is available in the catalog but the lead course instructor

		been agreed upon by faculty.	maintains consistency for the department.
Teaching Mentor	Course instructor	Course instructor provides guidance on teaching styles, pedagogical techniques, etc. Major Professor should also be mentoring their students in pedagogy and working with them to enhance their teaching skills.	Major Professor should be mentoring their students in pedagogy and working with them to enhance their teaching skills. Student may receive additional mentoring from the lead course instructor and other faculty members. Observation of teaching is highly recommended for providing constructive feedback and for recommendation letter writing.
Evaluator	Course instructor	Course instructor	Major Professor will provide evaluation at the end of the semester and completes evaluation form. The lead course instructor of the course may choose to provide feedback to the Major Professor as well.

All TA/TIs are expected to attend trainings such as through HDFS, CELT, CHS. All of these appointments require an end of the year “TA” evaluation to be turned into the DOGE. Evaluation forms will be sent out by the graduate program administrator near the end of the semester. They will also be available on the website. Please contact DOGE directly with any questions.

Appendix H: Review and Evaluation of Student Progress

In order to ensure student progress, the Graduate Faculty periodically reviews the progress of students through the program requirements. Each student is expected to work with the Major Professor and the members of the APC in order to complete the graduate degree within the time limits established by the Graduate College.

Annual reviews of each student's progress are intended to facilitate communication and problem solving through the graduate program. The evaluation process should give students timely feedback that allows them to optimize their graduate education. At any time during the year, any faculty member may provide feedback or express concerns relevant to the progress of a graduate student directly to the student or the student's Major Professor.

In the spring of each year, graduate students will be asked to submit a Curriculum Vitae as well as complete the Graduate Student Evaluation Survey. This survey will include information regarding requirements of the HDFS Student Professional Development Portfolio including: completed coursework, research experiences, conference presentations, research publications, teaching experience, and professional service experience. Students will also be asked to report on future goals, work in progress, and a timeline for completing their degree.

Annually, each Major Professor is expected to meet with each of their graduate advisees at least two weeks prior to the scheduled Graduate Faculty Graduate Student Review Meeting. The Major Professor and student should identify any problems or delays, and plan for the resolution of these difficulties. At the end of the meeting, the Major Professor needs to inform the student whether the progress and plan indicate satisfactory progress. During this meeting, the Major Professor should inform the student in writing of their recommendation to the Graduate Faculty. The Major Professor shares the recommendation with the Graduate Faculty at the scheduled Graduate Faculty Student Review Meeting. The Graduate Faculty discuss and vote on student recommendations (listed below). It is possible the Graduate Faculty may determine a different recommendation during the Student Review Meeting. If the student receives a recommendation of unsatisfactory, the graduate faculty will discuss whether that student should receive a probation warning, be placed on probation, or dismissed from the program. The recommendation to dismiss a student can only be made if the student is currently on probation.

Possible recommendations including:

- 1. Satisfactory, with no concerns;**
- 2. Satisfactory, with concerns;**
- 3. Unsatisfactory**

If a Major Professor and student are unable to meet, it is the responsibility of the Major Professor to provide the student with written feedback no later than two weeks prior to the scheduled Graduate Faculty Graduate Student Review Meeting.

If a student believes that evaluation by the Major Professor is based on inaccurate or incomplete information, the student may submit to the Graduate Program Coordinator, one week prior to the review meeting, a written report that presents their case for continuation. At this time the student

must also inform the DOGE if they desire to present their case orally to the Graduate Faculty at a time designated during the Graduate Student Review meeting.

Graduate Student April Review Meeting.

Student progress will be reviewed by the Graduate Faculty during a meeting of the Graduate Faculty in April of each year. **The Major Professor will be expected to report on their recommendation for each student's continuation in the program, including:**

1. **Satisfactory, with no concerns;**
2. **Satisfactory, with concerns;**
3. **Unsatisfactory (receive a probation warning, be placed on probation, or dismissed from the program)**

At this time, other graduate faculty may identify concerns (e.g., incomplete grades, unsatisfactory performance on assistantships). The DOGE will present a summary of any student's written request. Any student who has submitted a written report requesting continuation may request time at this meeting to present their case. The graduate faculty will vote on the recommendation of the Major Professor to continue, place on probation, or dismiss each graduate student. Only those students currently on probation can be dismissed. If the recommendation is not supported by a majority of the graduate faculty present, a new recommendation will be invited and voted upon.

Please Note: Within one week of the meeting, the Major Professor will provide each graduate student with a written report of the faculty's action and a summary of the feedback. Any student whose recommendation involves either probation or dismissal will receive a letter from the DOGE confirming the action of the graduate faculty and either specifying the reasons for dismissal or providing the following information related to the recommendation for probation:

1. Nature of the deficiency, as perceived by the faculty
2. Specific actions needed to rectify the deficiency
3. Deadline for rectifying the deficiency
4. Penalty for failing to meet these criteria

Mid-Year Probationary Meeting. Students on probation will be informed what progress must be achieved in fall semester in order to continue in the program. At the end of fall semester a Graduate Faculty Meeting will occur to Review Graduate Students on Probation. **Two weeks prior to this meeting, the Major Professor is expected to meet with their graduate advisees on probation and should identify if the probationary deficiencies have been met.** At the end of the meeting, the Major Professor needs to inform the student whether the progress and plan indicate satisfactory progress. During this meeting, the Major Professor should inform the

student in writing of their recommendation to the Graduate Faculty as to the continuation of that student in the HDFS graduate program. Possible recommendations include:

1. Satisfactory, with no concerns
2. Satisfactory, with concerns
3. Unsatisfactory (receive a probation warning, be placed on probation, or dismissed from the program)

Decisions regarding departmental assistantships will be based on students' annual evaluation of performance. As assistantship should not be awarded to a student who is not making clear progress toward the degree requirements for graduation.

Right to Appeal Annual Review Recommendation (*Approved by the HDFS Faculty September 21, 1998*). Any student has the right to appeal the recommendation of the graduate faculty through due process. Any student may request that a dismissal or probationary action be reconsidered. In the appeal of the review decision, the student will provide a written report that addresses the specific issues identified in the report of results by the Major Professor and DOGE. The student should submit this written report, in addition to any other relevant information, to the HDFS Department Chair and to the student's APC within two weeks following receipt of the dismissal/probation action. The Department Chair will assign the student's APC the task of investigating and reconsidering the decision in light of the additional information provided by the student. If the student and/or the Department Chair believe that the student's APC cannot impartially consider the appeal, the Department Chair will appoint an ad hoc review committee of at least three graduate faculty members to reconsider the case.

Following the investigation and reconsideration of the student's appeal, and no later than two weeks after the appeal is received, the review committee (APC or ad hoc) must present the student's request, the investigation results, and a recommendation for a specific decision for action to the Department Chair and the graduate faculty. The student must be informed in writing within 48 hours of the resulting decision and the explanation for the basis of that decision.

Further appeals by the student may be made according to the ISU Graduate College appeal procedures (see Graduate College handbook).

Appendix I: Human Subjects Approval

In order to comply with "Human Subjects - IRB Policy" requiring all ISU research be reviewed by the ISU IRB, *it is now required that all theses/dissertations contain proof of review in the Appendix of the document. This proof could be either a copy of the signed IRB approval of the research or a memo (email) from IRB stating that they reviewed the research and IRB approval would not be necessary.*

The HDFS department will not sign the final approval for a thesis or dissertation unless a copy of IRB approval, or a memo/email from the IRB indicating approval was not needed, is included in the Appendix of the thesis or dissertation. To verify inclusion, please email an electronic copy of the final submitted thesis/dissertation document to the HDFS Graduate Support Staff.

Approved by the HDFS faculty effective October 4, 2004

IMPORTANT:

The ISU HUMAN SUBJECTS CONTINUING REVIEW AND/OR MODIFICATION FORM must be filed with IRB when you modify your research proposal, e.g., change your methodology, change the informed consent form, increase the number of subjects or change types of subjects, add or remove personnel, or add new information for participants OR if you are working on the project past the expiration date of the original approval. If your protocol is exempt, you must file a modification to changes in procedures that would make the study no longer exempt or would change confidentiality protections. Failure to file a continuing review and/or modification form when warranted is in violation of Federal regulations. When in doubt, check with the IRB website or IRB staff. They are there to help you successfully comply with regulations and to protect the rights and welfare of your research participants.

The PROJECT CLOSURE FORM must be filed when the project has been completed or cancelled.

All applications/modifications/continuing review forms are submitted through [OneAegis](#). All key personnel must have completed CITI training prior to being added to a protocol. When you complete CITI training, be sure to affiliate with Iowa State University. See the [IRB website](#) for more information.

Appendix J: Discrimination and Harassment Policy

Please see <https://www.policy.iastate.edu/policy/discrimination>.

Appendix K: Graduate Student Thesis/Dissertation Research Fund (Approved Spring of 2021)

The Department of Human Development and Family Studies, as part of its mission to educate and support the learning experiences of its graduate students sponsors a *Graduate Student Research Grant Program (GSTDRF)*. The fund is to support mini-thesis/thesis (up to \$500) or dissertation (up to \$1,000) research. Funding approval entails meeting deadlines and including all necessary material (i.e., developing rationale for request, budget/budget justification, IRB letter). All funded proposal are contingent on the availability of funds. Funding approval will follow a process described in the checklist below. The checklist can be downloaded [here](#), in the student Cybox folder, or by request through emailing DeAnn Barnes (dhbarnes@iastate.edu).

This form provides the action needed from the student, Major Professor(s), DOGE, and department chair to award and disburse thesis/dissertation research funds.

Please refer to Appendix J of the [HDFS Graduate Program Handbook](#) for information explaining how funds can be used.

Student's/Requester's name _____

Date of thesis/dissertation proposal _____

Date the thesis/dissertation proposal was approved/conditions met _____

- ☐ 1. The student sends the following materials to the Graduate Program Coordinator-DeAnn Barnes (dhbarnes@iastate.edu)
 - ☐ a. Approved proposal
 - ☐ b. A brief rationale of why you are requesting these funds
 - ☐ c. An itemized budget

After completion of step one, the applicant's Major Professor(s) will be asked for confirmation that the funding request was discussed during the proposal and verifies they see this funding necessary to complete the project.

- ☐ 2. The applicant's Major Professor(s) verify that the funding request was discussed during the proposal and sees this funding necessary to complete the project.
- ☐ 3. Request routes to the DOGE and department chair for departmental approval
- ☐ 4. Student sends IRB approval letter or IRB exemption memo needed for disbursement of funds to the Graduate Program Coordinator.

After completion of all steps, the student and Graduate Program Coordinator will work together in the procurement of funds.

The student's Major Professor will verify the scientific merit of the request. The DOGE is responsible for the notice of grant award.

Eligibility: The student is responsible for a full and complete application. *Proposals will not be accepted from students who have not successfully completed their Proposal meeting, nor who receive conditional passes on their examination.* Students with a conditional pass can apply once the conditions are satisfied

Deadlines: Rolling applications based on the student's proposal defense date throughout the academic year (August 16-May 15). Award notices may be issued approximately 1 month following submission of a complete application during the academic year. Applications received during the summer months will be considered beginning August 15. Funding will not be disbursed until final IRB approval is received.

Application Requirements: The student sends the following materials to the Graduate Program Coordinator- DeAnn Barnes (dhbarnes@iastate.edu):

☐ Approved proposal

☐ A brief rationale of why you are requesting these funds

- Should be no more than 1 page, single spaced, 12-point font, 1-inch margins.
- The letter must include the date that the mini-thesis/thesis/dissertation proposal was approved by the APC. Date conditions were met if applicable.
- The letter should indicate the timeline for proposed research with sufficient detail to determine feasibility and likelihood that the student will meet those milestones.
- The letter should indicate plans for dissemination of research results including potential publication outlet(s).
- A statement must be made which indicates that the student will send their proposal document to HDFS DOGE as an exemplar proposal as a condition of receiving funds.

☐ An itemized budget

Please Note: *No funds will be allocated retroactively; expenses are honored only if they are incurred after the research fund approval date.*

Funds MAY be used for:	Funds may NOT be used for:
